BADGEPASS™

DATA SHEET

Technical Specifications:	
General Features	OCR & MRZ reading
	Reads all 50 states Driver's Licenses
	Reads standard passports
	No calibration necessary
	Anti-scratch glass
Camera	CMOS 3.2 megapixel
	Color depth: 30 bit RGB
	300 dpi resolution
Connectivity	USB 2.0
Dimensions	7.5" x 7.5" x 6.7"
Weight	1.98 lb

BMP054001

BadgePass OCR Passport Imager

The BadgePass OCR Passport Imager reads passport size and card size documents such as Driver's Licenses. The scanner reads and parses information from the MRZ line (Machine Readable Zone) combined with OCR (Optical Character Recognition) in supported countries. This system has no moving parts and helps to create a more efficient registration process.
