

MOBILE ID SPOT-DRIVE THRU MASS TESTING STATION COVID-19

Mobile ID Event Manager

STEP 1

*Test patient arrives

- Presents Driver's License or State ID
- Staff scans ID with MID Spot Scanner
- Type phone number into QR Generator App/Webpage
- Staff scan created QR to collect phone number
- Driver's License info and phone number print in text on label
- If no State ID/Driver's License available (children, etc.), then info entered MID Webpage and sent to printer in **Step 2**

STEP 2

- Staff collects printed labels for those with no DL or State ID at station
- Perform test
- Check into Event Manager and load data into Mobile ID with one scan
- Scan COVID19 test ID into 2nd ID field of MID

Web Browser used for Event Manager Check IN also simultaneously adds record to Mobile ID Server

Mobile ID Client locally installed to control printing

Print labels for those without State ID
