

BADGEPASS ONE IN GOVERNMENT

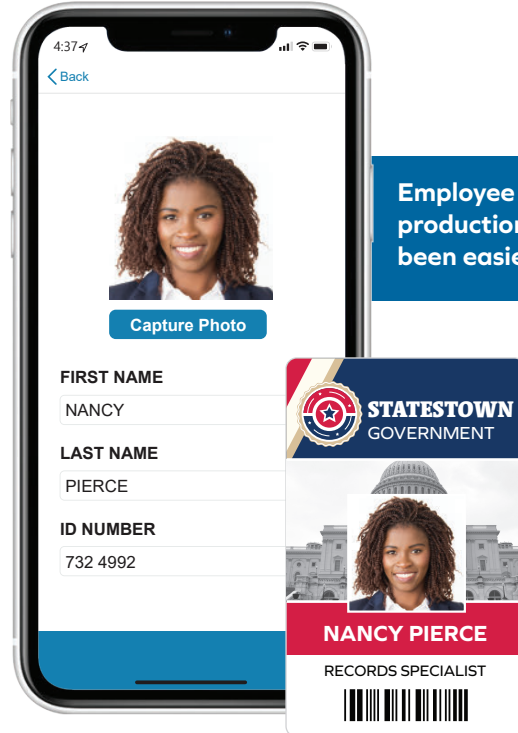

The first mobile ID badging software of its kind, **BadgePass ONE** makes managing and issuing IDs easier than ever before!

With BadgePass ONE, your agency or facility can easily capture photos and edit cardholder data right from a phone or tablet then print that badge to a local or remote card printer. Design your badging workflow around your specific needs and access the software from anywhere.

Best of all, our flexible pricing model is designed to make budgeting extremely easy! The system includes software, card printer(s), ribbons & support - all in one easy monthly or annual payment. Each subscription allows you to print up to the size of your cardholder database each year without worrying about ongoing supply costs; plus, you'll never have to worry about fees for additional support plans or maintenance again!

BENEFITS TO GOVERNMENT AGENCIES INCLUDE:

- Design easy to use apps for badge production for employees, contractors and more.
- Options to create apps specific to each agency or facility.
- Customized, secure card designs for all types of cardholders.
- Speed up the badge production process by capturing photos on a tablet or phone.
- Eliminate the need for employees to visit a specific location or office for photo capture and badge production.
- Submit print jobs to a queue, allowing card printing to occur on your preferred schedule.
- Lower IT burden as no software is hosted on-site, no server is required, and no printer drivers are required for the badge printer.
- Easy to budget, the system subscription includes all software, hardware, supplies and service, eliminating any surprise expenses each year.
- Automated monthly or annual payment options.

Employee badge production has never been easier!

From BadgePass ONE to physical card in just a few simple steps.
