

BADGEPASS ONE IN K-12 SCHOOLS

For schools, capturing photos and printing new ID badges for students and employees each year can seem like a daunting task. **BadgePass ONE** is here to change that!

BadgePass ONE is the first ID badging software of its kind. Downloadable from the iOS or Windows App Store, it offers a native app experience for badge production directly from your phone, PC, or tablet! Since the application is hosted, your school can eliminate costly on-site servers and computers, which dramatically reduces your IT needs and makes supporting your ID system effortless.

Best of all, our flexible pricing model is designed to make budgeting extremely easy! The system includes software, card printer(s), ribbons & support - all in one easy monthly or annual payment. Each subscription allows you to print up to the size of your cardholder database each year without worrying about ongoing supply costs; plus, you'll never have to worry about fees for additional support plans or maintenance again!

BENEFITS TO SCHOOLS INCLUDE:

- Design easy to use apps for badge production for employees, students, volunteers and more.
- Customized, secure card designs for all types of cardholders.
- Speed up the badge production process by capturing photos on a tablet or phone.
- Eliminate long lines of students waiting to have pictures taken at registration or after the start of the school year.
- Submit print jobs to a queue, allowing the badging office to print cards on their schedule.
- Options for local print at each school or centralized print.
- Lower IT burden as no software is hosted on-site, no server is required, and no printer drivers are required for the badge printer.
- Easy to budget, the system subscription includes all software, hardware, supplies and service, eliminating any surprise expenses each year.
- Automated monthly or annual payment options.
